## ABOUT ME

Web Developer with professional experience building and maintaining web-based applications. Skilled in HTML, CSS, JavaScript, React, and TypeScript, with hands-on experience in backend development using Laravel and RESTful APIs. Familiar with version control using Git and basic database concepts. Detail-oriented and reliable, with strong communication skills developed through professional customer service experience, and comfortable working in remote or collaborative environments.

## EXPERIENCE

Aug 2025 - Dec 2025

Elite Software and Data Security Inc.

### Full Stack Web Developer

- Developed and maintained a web-based Seafarer Crew Management System, supporting end-to-end management of crew records and operational updates
- Implemented responsive and user-friendly interfaces using Vue.js to ensure smooth navigation and efficient data handling
- Assisted in backend development using Laravel (PHP), handling business logic, data processing, and database interactions
- Supported system updates, bug fixes, and feature improvements to ensure reliable daily operations
- Worked closely with stakeholders to translate operational requirements into functional web solutions

Jul 2022 - Jul 2025

Pinnacle Tech Inc.

### Full Stack Web Developer

- Managed and maintained a School Management System, ensuring accurate handling of student, faculty, and accounting-related data
- Supported ongoing website and system maintenance, including updates, troubleshooting, and data validation
- Assisted in improving backend functionality using Laravel/PHP and frontend interfaces using Bootstrap, jQuery, and AJAX
- Helped optimize SQL database queries and reports for efficient data retrieval
- Performed full-stack debugging to resolve system issues and minimize downtime
- Collaborated with team members in an Agile environment, participating in sprint planning, standups, and code reviews

Feb 2022 - Jun 2022

Melham Company

### Software Engineer ( Intern )

- Assisted in the design and maintenance of internal software applications
- Worked with technical teams to translate business requirements into functional system features
- Provided support for workflow and system improvements to enhance usability and efficiency
- Helped document processes and system behavior for internal reference
